

Student Sheet: "SCRATCHing the Surface"

Name: _____ Date: _____ Session #: _____

Part I: Creating Your Scratch Account

When asked to do so, you will log onto a computer (or iPad) and create an account in Scratch. If you already have an account in Scratch, feel free to use that account instead.

JOINING SCRATCH	SIGNING IN IF YOU ALREADY HAVE AN ACCOUNT
<p>1. In your Internet browser, type the following:</p> <p style="text-align: center;">scratch.mit.edu</p> <p>2. Once the page loads, you will choose either of these "buttons":</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid blue; padding: 5px; display: flex; gap: 10px;"> Start Creating Join </div> <div style="border: 1px solid blue; padding: 5px; display: flex; gap: 10px;"> Join Scratch Sign in </div> </div> <p style="text-align: center;">(in the upper right-hand corner)</p> <p>(on the left side, near the middle)</p> <p>3. Choose a unique username; remember, do not use your real name. Then, create a password that is unique to you and you can remember.</p> <div style="border: 1px solid blue; padding: 10px; margin: 10px 0;"> <p style="text-align: center;">Join Scratch</p> <p style="text-align: center; font-size: small;">Create projects, share ideas, make friends. It's free!</p> <p style="font-size: x-small;">Create a username</p> <div style="display: flex; align-items: center;"> <input style="width: 80%;" type="text"/> <div style="border: 1px solid blue; padding: 2px; font-size: x-small; margin-left: 5px;">Don't use your real name</div> </div> <p style="font-size: x-small;">Create a password</p> <div style="display: flex; align-items: center;"> <input style="width: 80%;" type="password"/> </div> <div style="display: flex; align-items: center; margin-top: 5px;"> <input style="width: 80%;" type="password"/> </div> <p style="font-size: x-small; margin-top: 5px;"><input checked="" type="checkbox"/> Show password</p> <div style="text-align: center; background-color: orange; padding: 5px; margin-top: 10px; font-weight: bold; color: white;">Next</div> </div> <p>4. Write your username and password in the space below.</p> <p>_____</p> <p>_____</p> <p>5. When asked to enter your email address, use an email address that you have access to. An email will be sent to the address you provided and you will be asked to confirm your account. (Note: If you used your parent/guardian's email, please ask them to help you confirm your account).</p>	<p>1. In your Internet browser, type the following:</p> <p style="text-align: center;">scratch.mit.edu</p> <p>2. Once the page loads, you will choose either of these "buttons":</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid blue; padding: 5px; display: flex; gap: 10px;"> Start Creating Join </div> <div style="border: 1px solid blue; padding: 5px; display: flex; gap: 10px;"> Join Scratch Sign in </div> </div> <p style="text-align: center;">(on the left side, near the middle) (in the upper right-hand corner)</p> <div style="border: 2px solid yellow; padding: 10px; margin-top: 20px; text-align: center;"> <p>Remember: It is very important to keep your username and password safe. Providing it here allows your instructor to help you with this.</p> </div>

Part II: Identifying the Blocks

Now that you have created an account, it is time to examine all of the blocks that are available in Scratch. In the bar at the top of the page, select the “Create” option.

On the left side of your screen, you will see the block colors that are available. In the table below, label/identify the type of blocks associated with each color. **Note: The colors in the table are NOT listed in order as they appear in your Scratch account.**

Block Color	Type of Block	Block Color	Type of Block
			
			
			
			
		Note: Some of the colors may be difficult to differentiate. If you need help with this, ask your teacher (or a classmate) to help you.	

There are three key symbols when assembling your first project.

Identify the following symbols and state what they do or represent. Then, answer the questions that follow.

Symbol			
What this symbol does or represents			

How would you define what a single block does by itself?

What does a string of blocks (connected together) do?

Click on these buttons  (found in the upper right-hand corner, under your username). What happens when you click back and forth between these two buttons?

Part III: Learning the Moves

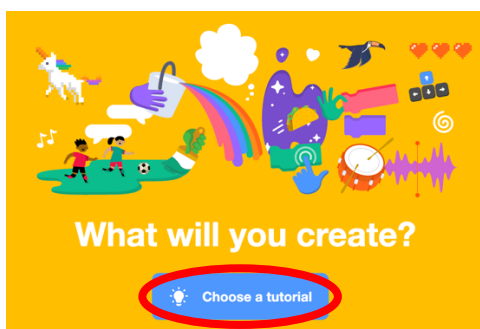

Return to the blue bar at the top of the page and click on the orange “Scratch” icon.

Then select “Ideas”.

On the next page, select “Choose a tutorial”.

Select the very first tutorial on the left, called “Getting Started”, and watch the video. As you watch the video, answer following questions.

1. Scratch can be used to create:

_____,
_____, and
_____.

2. When a block is dragged to the middle pane and it is clicked, what happens?

3. What color are the blocks that tell the code when to start? _____

4. (Fill in the blank) There are _____ block categories.

5. (Fill in the blanks) Blocks can be _____ or _____ at any time.

Click on the “Tutorials” button at the top of the page.

There are five types of tutorials you can investigate. Each tutorial in Scratch contains a short video clip; be sure to watch these videos!

To begin this activity, select the “Animation” tutorial and view the video.

1. Explore the different tutorials under this category.
2. Choose one tutorial and experiment with the blocks.
3. Assemble a group of blocks (at least five of them) by dragging and dropping them into the center of the screen. **You will need to use an “Events” block to run your animation.**
4. Once you have assembled your blocks (we now call this a **program**), take a screenshot of the group of blocks and place the screenshot in the table below.
5. Return to the tutorials page, and select the “Art” category.
6. Repeat steps 1-5 until you have completed one tutorial for all five of the tutorial categories in the table below.

Type of Tutorial	Name of Tutorial I Chose	Screenshot of Block Sequences
Animation		
Art		
Music

Extend Your Thinking: Blocks Build Brilliance

In computer programming, not all code is represented by blocks. Instead, specific words and punctuation are used. This is called “syntax”, and each programming language has its own syntax.

Scratch is a “block-based” language. Take five minutes to explore other block-based coding languages by typing the following link into an Internet browser:

<https://www.codingal.com/coding-for-kids/coding-guides/block-coding-guide/>
